

### FabriMural™

Since we cannot accurately predict the shrink and/or stretch of printed fabric, we strongly recommend that critical text or logo elements be placed at a minimum of 4" from any side of the fabric graphic. When we preflight the file, we will add sufficient bleed to assure that nothing will be eliminated in the finishing process. If the files provided do not allow us to do so, we will inform you before production. We prefer layered PSD or Adobe Illustrator files that will allow us to perform the proper preflight procedures.

**Files sizes for FabriMural should be 4" larger than the finished graphics.**

<u>Frame</u>	<u>Graphic Image Size</u>
T22	66.5" x 66.5"
T22 w/ Endcaps	66.5" x 92.5"
T32	66.5" x 97"
T32 w/ Endcaps	92.5" x 97"
T33	97" x 97"
T33 w/ Endcaps	97" x 123"

\* **Note:** Sizing assumes dye sub printed graphic is on poly knit material.
