

Graphic Attachment Instructions

Step One: Attach top rear of graphic panel to double sided tape on graphic hanger bar.
(Diag. A)

Step Two: Attach front bottom edge of graphic panel to double sided tape on leader sheet, as shown.
(Diags. B&C)

Step Three: Use a standard flat headed screwdriver to wind graphic into unit. We recommend between 20 and 24 complete clockwise turns to achieve optimum tension, although this may vary (+ / -) with different styles of graphic materials.
(Diag. D)

To untension graphic panel place screwdriver into slot and push to disengage ratchet. Hold in and turn counter-clockwise until tension in spring is released. To remove graphic panel carefully peel it off leader sheet. The graphic hanger may be removed or replaced.

Assembly Instructions

Diag. A

Diag. B

Step One: Unfold posts from centre section of casing and push together, as shown.
(Diags. A & B)

Diag. C

Step Two: Double sided units require a double sided bracket to be affixed at the top of post.
(Diag. C)

Diag. D

Step Three: Extend graphic panel out of base and locate over top of post, as shown. Repeat this process for second graphic panel, if you have a double unit.
(Diag. D)

Diag. E

****IMPORTANT NOTE****

When retracting a graphic always slowly guide it into base housing, otherwise graphic damage may occur.
